
PROJECT 5 NETWORK TOPOLOGY FOR TESTING

The following describes the network nodes and their connections of a sample network that you need to use to test your implementation of Project 5.

For the above graph generated by 5 routers with connections to other routers, run the routers on the following servers:

router A	cs-ssh.argo.uwf.edu, port 60010
router B	cs-ssh.argo.uwf.edu, port 60012
router C	cs-ssh2.argo.uwf.edu, port 60010
router D	cs-ssh2.argo.uwf.edu, port 60012
router E	cs-ssh3.argo.uwf.edu, port 60010
